YMWIC Foundation, Inc.
Presents the 11th Annual

SCHOLARSHIP AND AWARDS EVENT

Thursday, May 27, 2021

Live-Streaming Event on:
www.YMWICFoundation.org/archived-videos
LaFrance Corp. has been pleased to work with the YMWIC program since our relationship began in 2012. As an employer, we actively recruit and hire professionals in the targeted career area of Engineering. It is within the scope of our mission to identify and support young minority candidates as they prepare to enter careers within STEM fields. We recognize that a well-prepared American workforce benefits all of us and is of great benefit to our company and community. We are proud to continue supporting the YMWIC programs and each of it’s outstanding scholars.

Sincerely,

George Barrar
President and CEO
The YMWIC Core Values

YMWIC Core Values are critical to the success of the organization. The Board of Directors, staff, volunteers and Scholars aspire to live by these principles.

These values are designed to be measurable and will help determine personal and organizational commitment.

Before all business begins, the Core Values will be recited by the adults. Business would include, but not be limited to, Board Meetings, Parent Chapter Meetings, Project Committee Meetings, and certain internal work-related meetings, etc.

The meeting chair shall ask the participants, “Please prepare to recite the YMWIC Core Values.” Four participants will volunteer. One will stand and recite the first Core Value, followed by the next volunteer, until all four Core Values have been recited.

*We Believe*  we can significantly impact the future of our youth through education and extraordinary leadership.

*We Value Commitment, Honor and Accountability*  and through these principles we are dedicated to the tradition of excellence in serving our youth, our partners and our community.

*We Promote Engagement and Collaboration*  by treating all people with respect and sincerity to create an environment of openness where shared success can be achieved.

*We Demonstrate Quality*  by working efficiently and effectively to continuously improve our programs for the benefit of our Scholars.
HISTORY & MISSION

YMIC began with an idea generated by its founder and president, Mr. Richard Roberts, III. As a young engineering student at Widener University, Richard took note that there were not very many young men of color in his program of study. As a professional in the engineering field, he also found that colleagues from minority groups were few and far between. He began to formulate a concept: a program that would support African American and Latino males to develop their academic skills and gain the social supports they would need to be successful in college and in their careers.

After several years of developing and providing programs through volunteer efforts, YMIC became incorporated in 2007. Its 501c3 nonprofit certification to provide services to youth in 5th-12th grades in Philadelphia and suburban communities was received in 2010. The inaugural class of 18 male scholars began the West Chester Chapter in the fall of that year. During the 2013-2014 program year, YMIC opened its doors to young women and began doing business as Young Men and Women In Charge (YMWIC) Foundation, Inc., to provide programs in STEM-related leadership for young men and young women. During the 2019-2020 program year, as a result of enhancing its programming to better align with corporate partners to meet the country’s Workforce Diversity and Inclusion Initiative, YMWIC created five Pillars. The three primary pillars are the Pre-College Program for 3rd-12th grades, the Pre-Apprenticeship Program for high schoolers not seeking a four-year degree, and the Talent Development Program to prepare Scholars and alum for partner job shadowing, internships and post-graduate jobs. The Step-Up Program for 3-5 year old children and the Endowment and Scholarship Program round out the pillars that are the foundation of YMWIC’s service to its families.

YMWC’s mission to empower and prepare economically disadvantaged and historically underrepresented youth to excel and become leaders in STEM careers through academic tutoring, mentoring and financial assistance programs, accomplished by leveraging alliances with K-12 school districts, universities, corporations, and the Foundation’s committed partners. This mission is accomplished by embracing a family model that provides individually targeted services: academic support and tutoring, leadership development, scientific research training, public speaking, community service, junior mentoring, civics, college readiness, college tours, and industry experiences in many STEM-related careers. Scholars may participate in YMWIC Special Interest Groups, such as the Young Scholar Leadership Team (YSLT), robotics team, jazz ensemble, choir, civics and debate, and coaching from personal mentors in the STEM professions. Additionally, YMWIC’s STEM-based summer enrichment programs serve our Scholars and hundreds more students in first through twelfth grades.

Once enrolled in the organization, each Scholar and their family become part of the YMWIC family. They make a commitment to remain in the program until high school graduation, to participate fully in program activities and maintain a high grade point average.
While in college, thanks to the commitment of YMWIC’s corporate and university partners, each Scholar alum who maintains the Foundation’s academic requirements and standards is eligible to receive scholarship support and participate in internships that will prepare them for STEM careers or other professional careers.

YMWIC Foundation, Inc., offers five Academic Scholar Groups for students in grades three through twelve. Aligned with the Foundation’s mission, Scholar Groups and activities aim to bridge the gap between academic study and real life by providing opportunities, projects and challenges that simulate real-world experiences. Upon acceptance into the program, students are placed into one of the five grade-appropriate Scholar Groups:

<table>
<thead>
<tr>
<th>Scholar Group</th>
<th>Grades</th>
</tr>
</thead>
<tbody>
<tr>
<td>Future Stars</td>
<td>3rd and 4th</td>
</tr>
<tr>
<td>Pluto</td>
<td>5th and 6th</td>
</tr>
<tr>
<td>Neptune</td>
<td>7th and 8th</td>
</tr>
<tr>
<td>Jupiter</td>
<td>9th and 10th</td>
</tr>
<tr>
<td>Saturn</td>
<td>11th and 12th</td>
</tr>
</tbody>
</table>

The Future Stars, Pluto, and Neptune Scholar Programs are designed to increase students’ appreciation for math and science through hands-on projects that demonstrate the fun and challenging side of these subjects. Technical workshops in STEM are administered by staff or partners so that Scholars can gain deeper insight and exposure to these careers and opportunities. Jupiter and Saturn Scholars participate in more leadership, college, and career-readiness activities, as they prepare to transition to their post high school pathways. All Scholars complete scientific research projects to prepare them for the rigor of the STEM undergraduate curriculum. By memorizing and embracing the YMWIC Credo, each Scholar is reminded about accountability and the importance of giving back.

Today, YMWIC has seven chapters in these Philadelphia area school districts: Chester Upland, Coatesville, Norristown, Phoenixville, Upper Darby, West Chester, and William Penn. The YMWIC 2020-2021 membership includes 150 Scholars in our Pre-College program. We support over 50 alumni who are pursuing successful careers in STEM or other professions or continuing their studies as undergraduate and graduate students by providing them with annual scholarships, academic and mentoring support, and summer internships in their professional interests. Additionally, this is YMWIC’s 11th year hosting summer programs, having served over 1,000 Scholars in K to 12th grades.

Richard’s efforts and the services from YMWIC have given many families hope and comfort knowing that success in college and professional careers are within reach for their children. The community model is implemented through partnerships with corporations, universities, and other nonprofit and community organizations. These partners participate in all levels of the program. The goal is to implement this community-based model in all school districts in our country that have significant numbers of underperforming students. This accomplishment will make a significant impact on the achievement gap among African American and Latinx youth in math and science, increase the number of women in STEM, and impact community economic development by growing intellectual capital and cultivating a sense of social responsibility.
YMWIC SCHOLAR CREDO

The YMWIC Credo is a concept and belief for Scholars to adopt as a tool for success. The YMWIC logo represents the Shield for Success. The Shield represents a philosophy that we are not alone in our journey toward becoming successful professionals. The young men and the young women are reaching for the stars. The Wreath represents the goal of academic achievement, obtaining a college degree and working in a profession that provides the Scholar with financial security and the ability to pay it forward to others. Within the Shield are the elements of science, technology, engineering and math, which are fields of study that will position our Scholars to make a difference in our community.

A Scholar Leader shall ask fellow Scholars, “Who are you?” The fellow Scholars reply, “I am a young Scholar in charge!” The Scholar Leader repeats this question until all Scholars reply with authority and in unison. Finally, the Scholar Leader requests the Scholars to recite the Credo by stating, “Credo Please!” and in unison the Scholars recite the following Credo:

*I am a Young Scholar in Charge!!*

I am bold and strong. I will banish fear and doubt, and I know that I am not alone in my journey towards success.

*I am a Young Scholar in Charge!!*

I have accepted the challenge of committing myself to the YMWIC Foundation, Inc. I understand the importance of being able to draw from my faith and experiences to shape and influence my academics, my relationships and my future as a professional.

*I am a Young Scholar in Charge!!*
MICHAEL ALLEN BROWN
High School: B. Reed Henderson High School &
Chester County Technical College High School
College & Major: Millersville University; Sociology & Criminology

Being in all honors classes for every year of high school was no easy feat for me. However, while also studying criminal justice at TCHS and being a member of the YMWIC Foundation Inc., my purpose in life grew clearer as I learned more with each passing year. Being involved in the UNITY club at Henderson allowed me to become more knowledgeable about racial injustices, and further pushed me to strive for a law-based major in college.

I have been a part of YMWIC since third grade, attending the elementary summer camps, as well as college trips at universities and colleges such as Saint Vincent’s, Drexel, and Millersville. Not only has YMWIC evolved over the years, but so have I. The Foundation has made an immense impact on my life intellectually and morally, teaching me many core values of life, and introducing me to a vast array of information that I continue to carry with me. Through the college tours I was able to find the perfect college for me: Millersville University. Not only did YMWIC prepare me for college level material, but also it encouraged me to make leaps and bounds that I otherwise would not have made. Completing different research projects each year paved the way for understanding which field I want to guide my college studies.

Some advice that I would like to share to the upcoming Scholars is to take the opportunities that present themselves to you. You should seize every educational opportunity that you can. I believe it is best to immerse yourself in many different varieties of activities and studies. Without exploring, you might miss out on something you would later come to enjoy in life.

DERRICKE CAMACK
High School: Renaissance Academy Charter School
College & Major: Elizabethtown College; Biomedical Engineering

I am a senior at Renaissance Academy Charter School. In the fall, I plan to attend Elizabethtown College for engineering with a biomedical concentration. Through my high school years, I have taken many honors courses in Biology, English, History, and Psychology. I have proudly achieved high honor roll status regularly during my high school career, as well. During my extracurricular activities, I have been involved in different Robotics clubs, Chess clubs, and Investment clubs. In addition, I played varsity football in the Defensive End and Nose Guard positions in my junior year.

I have only been a YMWIC Scholar for a year, but the program has had a profound effect on my life. For example, my time on the robotics team has taught me a lot about meeting deadlines and working with others, in addition to the fundamentals of mechanical engineering. I think my most memorable experience was in Robotics. My task was to create a robot that could grab several figures that represented astronauts. It took many tries and prototypes to get the proper configuration. When I finally made it work, I felt like I had just landed a rover on Mars. That feeling is why I want to go into engineering.

My advice for younger Scholars is to avoid procrastination at all costs. It is easy to trick yourself into thinking you have more time when you don’t.
JOSHUA COLEMAN
High School: Pottsgrove Senior High School
College & Major: Montgomery County Community College; Music Technology

Before transferring to Pottsgrove High School, I attended Methacton High School. There, I took Honors Social Studies courses and played Freshman basketball. I’ve played Double Bass with the Methacton Orchestra and the YMWIC Jazz Ensemble for nine and five years, respectively. I spent the summer of 2018 working as a camp counselor in the Phoenixville Borough’s “Camp Unforgettable.” I have been an active leader of the Bethel Baptist’s Children’s Church since 2015. I often volunteer at the Southeastern Veterans Center where I have done short term work with retired veterans in the nursing home in Spring City, Pennsylvania. As a hobby, I enjoy using recording technology, utilizing it to make and experiment with original music. This has influenced my decision to major in this area in college.

I have been a YMWIC Scholar for nine years, first as a Junior Scholar in the West Chester Chapter, then an inaugural member of the Norristown Chapter. The YMWIC Foundation sparked my interests in the STEM fields as well as exploring college opportunities. My most memorable moment was volunteering with the young people at the YMWIC Scholar Camp in 2017. I really enjoyed assisting and helping the new generation of Scholars. Additionally, YMWIC has reshaped my view about higher education by helping me to choose colleges based on my skills and perspective. My advice to young Scholars is even when you don’t feel like completing a task, it’s always best to remember your end goal. And remember that everyone on YMWIC is providing these opportunities for you to better yourself.

LESLIE GALAN ALVAREZ
High School: B. Reed Henderson High School
College & Major: Delaware County Community College; International Business

As a student at Henderson High School, I have participated in the Black Student Union and the Unity Club. As a leader in the Unity Club, I’ve continued to participate in making Henderson a safe place for all races and considering new ideas on how Henderson can change so students can be heard. I have been consistent in taking business classes for four years. I have expressed my creativity by participating in managing a fundraiser for my school’s assignment team. Henderson has allowed me to foster my sociability and inclination to aid others, and as I step into the next chapter of my life, I will greatly miss the educators and peers that have shaped me.

I have been a YMWIC Scholar for two years. In this time, I have come to realize the importance of educators and their contribution to the lives of budding students. For me, the most meaningful memory as a member of this incredible foundation has been the summer camps, where I met many wonderful people and was provided the opportunity to help others as I fostered my interest in science.

For younger Scholars looking into the future, I think it is vital to take advantage of all the opportunities presented to you. If anyone experiences doubt or confusion about future goals, I recommend participating in activities such as YMWIC’s job shadowing to get real-life experience and a sense of self to realize what you enjoy and want to do in life. It is incredibly important to stay dedicated to and focus on your academic endeavors. Commitment is key to succeeding in educational pursuits and gaining knowledge. It is important to take your education seriously because it will affect your future and that of your future generations. In the words of the great Nelson Mandela, “Education is the most powerful weapon which you can use to change the world.”
CECILIA CASTANEDA JIMENEZ
High School: West Chester East High School & Chester County Technical College High School
College & Major: West Chester University; Nursing

Through my four years at East, I have taken AP and Honors courses. By being committed to studying, I have maintained a 4.0 GPA and have received the AP Scholar with Honors Award, given to those students who have earned an average score of 3.25 or not less than a 3 on all AP exams taken. Because my awe for science has grown, I also attend the Allied Health program at TCHS, exploring the world of medicine. Beside my academics, I am the co-President of the Young Democrats club where we have organized a voter registration drive. I am a member of the National Honor Society and a senior officer of the National Art Honors Society. In addition, I have participated in the Science Olympiad (SCIOLY), where I have won first place in two separate events.

I began participating in the YMWIC Foundation during my sophomore year. The Foundation has shown me how much hard work truly pays off and that there is so much more to learn from mentors. While using many of its resources, I have developed better communication and professionalism skills. There have been so many opportunities that I would have never had without such a wonderful program. Thanks to YMWIC, I have been able to participate in many activities that have grown my interest in science, including a pig dissection, trips to Lincoln University, and so much more. Two of my favorite activities at YMWIC are the annual college tour and job shadowing at the Children’s Hospital of Philadelphia and Penn Medicine.

My advice to young Scholars is to take every opportunity you can, even if you think you may not like it. You may find a hidden passion that could turn out to be the subject you most like. In addition, don’t be a procrastinator and never lose your motivation for the things you love. Finally, never degrade your intelligence. If you challenge yourself, you will be the best, most academic version of you.

STONE CASTOR
High School: Norristown Area High School
College & Major: Penn State University Berks Campus; Accounting and Information Systems

I am proud to be an honor roll student and taken honors classes. I have been involved in orchestra, card club, and track while attending high school. While involved in a non-profit organization that gives back to the community, I have learned hands-on computer skills. I used those skills to train young adults to increase their computer knowledge. I also was fortunate to travel to Spain with my high school to explore the world.

I have been a YMWIC Norristown Chapter Scholar for two years. I was awarded the Saturn Scholar of the year. I have gained a lot of experience in various workshops and job shadowing. My most memorable job shadowing experience was with Astra Zeneca Information Systems project manager, Ms. Arcot. The YMWIC job shadowing experience has helped me decide to pursue a degree in accounting and information systems. Young Men and Women In Charge has taught me that education is the key to success.

My advice to younger Scholars is do not give up on your education when people say you have no chance of going to college. Anything is possible with hard work and a desire to learn.
LIZETH GALAN CASTILLO
High School: B. Reed Henderson High School
College & Major: Delaware County Community College; Nursing

I attend Henderson High school. After graduation, I will attend Delaware Community College and major in Nursing. My high school experience was great. I had great support from all my teachers. Being part of Henderson and having people I can talk to has brought me a long way because I know I’m not alone.

I have attended the YMWIC for two years. My experience was great being part of the YMWIC program. I enjoyed the community service projects, visiting the different universities and colleges, and the group activities.

Some advice that I would give a younger Scholar is to follow your mind on what you want to study. Don’t think you have to go a certain path because that’s what others think is best.

ABIGAIL GARCIA GALAN
High School: Collegium Charter School
College & Major: Immaculata University; Undecided

Throughout high school, I have taken advanced placement and honors courses at Collegium that have helped me better my academics. I am co-president of the National Spanish Honor Society and a member of the National Art Honor Society. I have also been part of Collegium’s volleyball team, cheer squad, and lacrosse team.

I have been a member of YMWIC West Chester Chapter since 2018. YMWIC allowed me to have opportunities I would have not had unless involved with this STEM program. I got to have a job shadowing experience at La France, as well as attend the college tour and see what different colleges and campuses had to offer. One of my most meaningful memories was the Lincoln University workshop where Scholars had the opportunity to do a lab with different blood types. My advice to the younger Scholars is to continue to put forth effort even if you are tired or unsure of the path ahead of you because the effort that you put in will showcase itself in the end.

NATALIA JIMENEZ
High School: West Chester East High School
College & Major: New York University; Environmental Engineering with concentration in Sustainable Urban Environments

As an honor roll student at WC East High School, I have taken honors and AP classes, such as Chemistry and Biology. I am President of the West Chester East Recycling Club, where I plan and organize educational events about the importance of proper recycling and sustainability. I am an active member WC East Track Team and Theatre Company. Last fall, I was inducted into the National Honor Society.

This is my second year as a Scholar in the YMWIC West Chester Chapter. I have gained many new skills and experiences through workshops and job shadowing. I believe I can apply all of what I have learned through YMWIC in a classroom setting and in life. I have built relationships with fellow Scholars and believe YMWIC promotes a very engaging and welcoming environment. My most meaningful memory was gaining the opportunity to communicate with college students and listen to their college advice. I would encourage younger Scholars to not be afraid to ask for help, and to believe in, trust in, and take care of yourself.
ASIA TILGHMAN  
High School: Collegium Charter School  
College & Major: Lincoln University; Computer Science

I have amplified my academic career through enrollment in rigorous courses at Collegium. As an actively-involved student, I am a member of the Black Student Union, a student leader for the Academic Team, and a participant on multiple committees for student success. Outside of school, I serve as an Ambassador Level Girl Scout. I hold more than five Presidential Service Awards and a Leadership Award from the Collegium Student Council. I also won the YMWIC Foundation Science Presentation Award in 2021.

As a member of the YMWIC Coatesville Chapter for three years. I have obtained insight on different career fields like Engineering, Finance and Science. I will forever hold onto the friendships I made, as well as the mentors who continue to guide me. YMWIC has impacted how I view the world and has taught me to “always put myself out there,” because I will never know what doors it can open. My most meaningful activity while in the Foundation was participating in the Upward Bound Summer Camp. It was an eye opener for me to be around like-minded students who were my age.

My advice to the younger Scholars, “Listen to your mentors. They will never steer you wrong. The solution might not come when you want it; but if you keep doing the work, it will show up.”

TIARE VALENZUELA  
High School: Conestoga High School  
College & Major: Boston University; International Business and Marketing

Throughout high school I have taken mostly honors and Advanced Placement classes. I have been actively involved in Peer Mediation where I am responsible for organizing major school events as head secretary. I am also a Conestoga Anti-Stress ambassador, member of Voice for Vets, Best Buddies, Natural High Club leader, Tredyffrin Easttown TV editor and an alto in Concert Choir. I have made sure to uphold my studies to guarantee my place on the honor roll throughout all four years of high school. I have had the pleasure of actively speaking for the Conestoga Latinx community at school board meetings to secure a safe place for everyone to learn.

I have been a Scholar in the YMWIC West Chester Chapter for four years. YMWIC gave me access to experiences and learning opportunities I could not find elsewhere. I have had the ability to witness professionals in my desired industry through job-shadowing with partners of the foundation. My most significant memories include the college tour and the workshops that are held twice a month. I value the relationships I made in the program and I look forward to seeing what is ahead for us all.

My advice to younger Scholars is to allow yourself to see things in a different perspective. You cannot control your situation, but you can control how you view it. Appreciate the opportunities you have been given. When it seems all too overwhelming, do not be afraid to lean on your support system because all they want to do is see you succeed.
SANTIAGO VENTURA
High School: B. Reed Henderson High School
College & Major: Temple University; Finance
Temple University Honors Program, Fox School of Business Honors Program

Throughout my high school career, I have always been academically driven. By taking courses at the honors level and the AP (Advanced Placement) level, I have maintained my courses as rigorous as possible. I am a part of the National Honor Society, National Business Honor Society, National Latin Honor Society, vice president of DECA, Co-President of Henderson’s Equity Student Union, among other extracurricular activities. In addition, I have been awarded the West Chester Area School District Humanitarian Award, College Board AP Scholar Award, DECA Marketing States Award, and many more.

I have been a member of the YMWIC Foundation for 3 years. I believe that if it were not for the opportunities provided by YMWIC and their sponsors, I would not have had most of these experiences. The program has opened many doors; one of them being the ability to attend college. One of the most meaningful activities for me was the campus tours, as time constraints prohibited me from touring so many universities on my own. Because of YMWIC, my networking and personal branding skills are continuing to develop, and I will utilize the teachings from YMWIC as I go on to college.

My advice to younger Scholars would be to take everything seriously. The experiences you make in high school will ultimately impact the decisions and opportunities that may lie ahead in the future.

FALLON WARNICK
High School: Henderson High School & Chester County Technical High School
College & Major: North Carolina A&T State University; Computer Science

As an Honor Roll student, I have completed multiple honors and AP classes throughout my high school career. Classes such as Computer Programming, AP Computer Science Principles, and the Robotics and Mechatronics program at the Chester County Technical High School have helped further my knowledge in computer science. I have had a passion for technology since a young age, which I think will set me apart in my college classes. I am an active Black Student Union member, Equity Student Union member, and I work on the sidelines to speak out about racial injustice in America. Among my awards are YMWIC Scholar of the Year, YMWIC Science Project 1st place winner, Honor Roll student, and Outstanding Student award at Henderson High School.

I have been a YMWIC West Chester chapter Scholar for five years. While being involved with YMWIC, I embraced my interest in STEM, which has opened many doors for me. Some of my most memorable activities in YMWIC are working for the organization in the summer Elementary School Camp and the College Tours. The College Tour is a chance for Scholars to bond as a family and to see what their future could look like. On one of the College Tours, I toured North Carolina A&T, my future home for the next 4 years. My advice to younger Scholars is never lose sight of your goals. However, when the work is done make sure to have some fun.
# YMWIC FOUNDATION GRADUATES
## WHERE ARE THEY NOW?

### 2010 Graduates

**Brandon Barr:** Senior Consultant, Booz Allen Hamilton  
North Carolina A&T State University, Class of 2015  
Bachelor of Science, Computer Engineering

### 2011 Graduates

**Tyrell Watson:** Temple University, Class of 2016  
Bachelor of Science, Kinesiology

### 2013 Graduates

**Jesse Amankwah:** Management Training Program, SRS Distribution  
West Chester University, Class of 2019  
Bachelor of Science, Business Management

### 2014 Graduates

**Adanne Coleman:** Chief Medical Scribe, ScribeAmerica™  
University of Pittsburgh, Class of 2018  
Bachelor of Science, Psychology  
**Erin Cunningham:** PPD: Global Pharmaceutical Contract Company  
West Chester University, Class of 2019  
Bachelor of Science, Chemistry  
**Blake Pennyman:** Brewery Rep, Boston Beer Company  
St. John’s University, Class of 2019  
Bachelor of Arts, English  
**Sarai Sherfield:** PhD Fellow, Georgia Tech  
Norfolk State University, Class of 2018  
Bachelor of Science, Electronics Engineering

### 2015 Graduates

**Jason Bady:** Information Systems Associate – YMWIC Foundation, Inc.  
York College, Class of 2020  
Bachelor of Science Computer Engineering  
**Jaesohn Moncrieffe:** Component Engineer, Boeing Aerospace  
Carnegie Mellon University, Class of 2019  
Bachelor of Science, Mechanical Engineering  
**Dekwuan Stokes:** PhD Student, Electrical Engineering, University of Pittsburgh  
University of Pittsburgh, MS Electrical Engineering, 2021, BS Electrical Engineering, 2019

### 2016 Graduates

**Damon Barr:** Community College of Philadelphia, Class of 2022  
Major: Psychology  
**Dominique Foster:** Temple University, Class of 2022  
Major: Biology  
**Rajan Jones:** Mechanical Engineer, GE Aviation  
Lehigh University, Class of 2020  
Bachelor of Science, Mechanical Engineering  
**Zachary Merritt:** Community College of Philadelphia, Class of 2022  
Major: Biomedical Engineering

### 2017 Graduates

**Shamar Hunter:** University of Pittsburgh Johnstown, Class of 2021  
Major: Computer Engineering  
**Dulce Juarez:** Benefits Advisor, American Income Life  
West Chester University of PA, Class of 2020  
Bachelor of Science, Business Management  
**Trevor Staples:** Penn State Brandywine, Class of 2021  
Major: Biology
2018 Graduates

John Coleman: Millersville University, Class of 2022  Major: Sound and Recording Technology
Rya Jones: Saint Vincent College, Class of 2022  Major: Health Science
Janelle Pedroza: West Chester University, Class of 2022  Major: Molecular Biology
Tyzhana Raison: Saint Vincent College, Class of 2022  Major: Chemistry
Valeria Reynoso: Delaware County Community College, Class of 2022  Major: Mechanical Engineering
Sebastian Rosas: Montgomery County Community College, Class of 2022  Major: Civil Engineering
Arrielle Zurita: Delaware County Community College, Class of 2022  Major: Criminal Justice

2019 Graduates

Jaremy Bady: Temple University, Class of 2023  Major: Electrical Engineering
Brooklyn Green: North Carolina A&T State University, Class of 2023  Major: Chemical Engineering
Ciara Hairston: Delaware County Community College, Class of 2023  Major: Health Sciences
Jocelin Marin: Gwynedd Mercy University, Class of 2023  Major: Occupational Science
Zyashia Rokins: West Chester University, Class of 2023  Major: Biology
Cory Staples: Temple University, Class of 2023  Major: Health Professions
Cristopher Story: University of Pittsburgh, Class of 2023  Major: Computer Science

2020 Graduates

Edith Bradley: West Chester University, Class of 2024  Double Major: Spanish and Political Science
Diana Galan-Galan: West Chester University, Class of 2024  Major: Exercise Science/Pre-Physical Therapy
Juanita Jacobs: Delaware County Community College, Class of 2024  Major: Nursing
Omari McClanahan: Temple University, Class of 2024  Major: Mechanical Engineering
Christopher Mendoza: Immaculata University, Class of 2024  Major: Business Management
Ruben Morales: Universal Technical Institute, Class of 2022  Major: Automotive Technology
Imaria Osifo: Delaware County Community College, Class of 2022  Major: Marketing
Ta'Jae Paul: Widener University, Class of 2024  Major: Chemistry
Raisa Sabiha: Chestnut Hill College, Class of 2024  Major: Biology/Pre-med
Citli Tapia: Delaware County Community College, Class of 2024  Major: Early Childhood Education
Matthew Wilford: Cheyney University, Class of 2024  Major: Computer Science
CELEBRATING THE NEXT GENERATION OF LEADERS

At Children’s Hospital of Philadelphia, we offer many programs to help today’s young people develop the skills they need to become tomorrow’s leaders. We are grateful to our friends at Young Men and Women in Charge for sharing our commitment to training the next generation of researchers and scientists.
The secret of getting ahead is getting started.

-Mark Twain

AGI, an Ansys company, is proud to be a sponsor of the YMWIC 11th Annual Scholarship and Awards Banquet.

YMWIC INDUSTRY EXECUTIVES AND COMMUNITY CHAMPION AWARDS

West Impact Award
The West Impact Award, named for West Pharmaceutical Services, Inc., is given to an organization that improves the quality of life for others, is socially responsible, is connected to and makes a significant impact in the communities it serves, values educating and inspiring youth to pursue academic excellence particularly in STEM-related courses, and embraces a culture of philanthropy and community involvement.

Educational Leadership Award for Secondary Education
This award is given to a highly effective community member at the secondary level who has been impactful on our organization, provides leadership in our communities, is committed to education, values academic excellence, and is an advocate for YMWIC Foundation.

Educational Leadership Award for Post-Secondary Education
A highly effective community member at the post-secondary level who has been impactful on our organization, provides leadership in our communities, is committed to education, values academic excellence, and is an advocate for YMWIC Foundation is chosen to receive this award.

Community Leadership Award
This prestigious award is given to a leader who is a strong advocate for economic development, promotes policies that strengthen families and communities, and supports our mission. This award also recognizes a forward-thinking Community Champion with integrity who unselfishly serves, builds self-efficacy, and inspires and empowers others.

Infrastructure & Engineering Software & Solutions

WEST IMPACT AWARD

The West Impact Award will be presented to Bentley Systems, a valued partner. Dan Koval, Finance and Facilities Manager, will accept this prestigious award.

Bentley Systems (Nasdaq: BSY) is the infrastructure engineering software company. We provide innovative software to advance the world’s infrastructure – sustaining both the global economy and environment. Our industry-leading software solutions are used by professionals, and organizations of every size, for the design, construction, and operations of roads and bridges, rail and transit, water and wastewater, public works and utilities, buildings and campuses, and industrial facilities. Our offerings include MicroStation-based applications for modeling and simulation, ProjectWise for project delivery, AssetWise for asset and network performance, and the iTwin platform for infrastructure digital twins. Bentley Systems employs more than 4,000 colleagues and generates annual revenues of more than $700 million, in 172 countries. www.bentley.com.

Dr. Daniel P. McGarry, Superintendent, Upper Darby School District

EDUCATIONAL LEADERSHIP AWARD FOR SECONDARY EDUCATION

Dr. Daniel P. McGarry has been in education for 20 years in the Upper Darby School District and has committed his professional life to serving the students and families of the city he grew up in and loves. Dr. McGarry’s career path has provided him with the opportunity to experience the full educational process from elementary school through central administration. Having served at the high school teacher, administration, as well as the district level, Dr. McGarry is driven by the District’s tagline of Opportunity, Unity, and Excellence.

Dr. McGarry is committed to providing quality educational experiences for all students. His leadership focus is on ethical decision-making, teambuilding, equity and providing opportunities for all students. He believes that the work of educating and supporting our students demands a comprehensive approach.

He has developed many educational partnerships and collaborations, including Dr. Angela Duckworth and the University of Pennsylvania, “... on perseverance and Grit among 12th grade students,” (Perkins-Gough, 2013); Dr. Eran Magen of The Center for Supportive Relationships to foster more meaningful sustainable relationships between teachers and students; NOVA’s (PBS) School of the Future documentary/movie, How can the science of learning help us rethink the future of education for all children? (Sept, 2016) and with Public Citizens for Children and Youth in the development of School Play: It’s a tough subject (April, 2015).

Among the national education conferences where Dr. McGarry has presented are the National Association of School Psychologists (NASP), the NASP/George Washington University Public Policy Institute, the NRCP & FC Supporting Successful Experiences for Students in Foster Care through Collaboration, as well as appearing on the NASP Podcast.

Dr. McGarry earned his undergraduate degree in English and Secondary Education from the University of North Carolina, his Masters in Educational Leadership and Supervisory of Curriculum and Instruction from St. Joseph’s University, and his doctorate of Education from Neumann University. He completed the Pennsylvania Association of School Administrators Superintendents’ Academy in 2015.
Mr. Aaron A. Walton, President of Cheyney University of Pennsylvania

EDUCATIONAL LEADERSHIP AWARD FOR POST-SECONDARY EDUCATION

President Aaron A. Walton, a proven, results driven leader with 40 years of experience in corporate level management, was appointed as Cheyney University of Pennsylvania’s Interim President on May 31, 2017. He spearheaded unprecedented progress during his first five months, which led to his election as permanent President by the Board of Governors of Pennsylvania’s State System of Higher Education (PASSHE) in November 2017.

President Walton is a fearless champion for Cheyney University and its students. He has addressed the University’s challenges head-on while defining a new trajectory and outlining a clear vision for the University — to produce students who excel in academics, character, and social responsibility. These three pillars ultimately became the foundation of Cheyney’s new vision to be known as the premier educational model for academic excellence, character development, and social responsibility.

President Walton is a former Senior Vice President of Highmark Inc, a leading healthcare provider, and was responsible for providing overall management and direction of all corporate activities nationally. There, he established and implemented award-winning strategic healthcare initiatives that yielded community and companywide growth and advancement, including one of the first programs in America to address childhood obesity and bullying, and the Children’s Health Insurance Program, better known as C.H.I.P, which has become a national model.

President Walton has held numerous chairmanships and advisory roles on more than 35 community boards. Among them are the PASSHE Board of Governors, California University of Pennsylvania’s Council of Trustees, the August Wilson Center for African American Culture, Kappa Alpha Psi Fraternity, Inc., Polemarch Pittsburgh Alumni Chapter, the Kappa Scholarship Endowment Fund, the Negro Emergency Educational Drive, The 100 Black Men of Western Pennsylvania, and Sire Archon, Rho Boule, Sigma Pi Phi Fraternity.

President Walton earned a Bachelor of Science degree in Speech Pathology and Audiology from California University of Pennsylvania and a Master of Public Management from the Heinz College of Information Systems and Public Policy at Carnegie Mellon University. He and his wife, Dr. Gloria M. Walton, have two adult children and two grandchildren.

Dr. Andrew E. Dinniman, Pennsylvania Senator, 2006-2020

COMMUNITY LEADERSHIP AWARD

Senator Andy Dinniman, D.Ed., has long served the citizens of Chester County as State Senator, County Commissioner, and School Board Member. He is the recipient of over 135 local, state, and national awards and recognitions for his public service.

An important part of Dr. Dinniman’s community work has included boards and commissions, including the Ben Franklin Technology Development Authority; the State Board of Education; the Education Commission of the States; the Lincoln University Board of Trustees; the Pennsylvania Historical and Museum Commission; the Chester County Historical Society; the State Public School Authority; the Pennsylvania Higher Educational Facilities Authority; the National and State Democratic Committees; Chairman of the Chester County Democratic Committee; and delegate to five National Democratic Conventions.

Dr. Dinniman has also been a professor at West Chester University, and continued his focus on education by serving as Minority Chair of the Senate Education Committee for over twelve years. Dinniman strongly believes that the opportunity for high quality education is one of the most fundamental civil rights. This is why he supports the work of the YMWIC Foundation and is honored to receive its award.
KEYNOTE SPEAKER

Michael J. Duncan
Chester County Hospital and Health System – Penn Medicine
President and Chief Executive Officer

Michael Duncan is a 1978 graduate of the United States Naval Academy with a degree in Engineering Physics. His naval career as a nuclear engineer included a tour on a fast attack submarine, followed by an academic appointment at The Naval Submarine School where he served as a tactics instructor for senior officers.

A native of Fort Worth, Texas, Mike entered the developing field of managed health care in the late 1980’s and was asked to run his first HMO in 1989. In this capacity, Mike focused on new models for health care delivery, including the application of managed care principles to rural and frontier communities.

Since 1995, Michael has served as Chief Executive Office of three large academic physician groups - Columbia Doctors, a 1,400-member physician group at New York Presbyterian Hospital, Temple University Physicians, and the University of Oklahoma Physicians. He also led a startup Medicaid HMO, served as CEO of a Rehab Hospital and was President of a Physician Hospital Organization during the course of his career.

In May of 2011, Mike joined the Chester County Hospital and Health System as President and Chief Executive Officer. This organization, nationally recognized for low-cost, high-quality patient care, is now a member of the University of Pennsylvania Health System/Penn Medicine.

Mike’s management philosophy is “Love People, Expect Excellence.”

We are privileged to have Mr. Michael Duncan, a respected and distinguished health care professional, deliver the keynote address.
EMCEE

BARBARA GEE, Owner and CEO
PositiveLee For You

After spending over 25 years in corporate America, Barbara left a successful career in communications and launched a Leadership Coaching and Image Consulting Firm.

A results-driven professional who places a strong value on people first, Barbara launched her company in November, 2015 to equip clients with the knowledge, practical tools and actionable steps to prepare and package themselves to successfully navigate that “next level” and beyond. PositiveLee For You offers Leadership Coaching, Image Consulting, Motivational Speaking, Branding, and Etiquette Training services to both individual and organizations, as well as access to a net-work of proven service providers for additional services that assist in rounding out and solidifying clients’ new images.

Barbara is also a sought-after speaker who has helped countless individuals and groups in the private and non-profit sectors through her inspiring seminars, keynotes and workshops focused around helping people realize their full potential.

Barbara began her career in management at Verizon, where she held various progressively senior roles in sales, marketing, product and brand management and advertising. She then went to Exelon (PECO Energy) as manager, then director of Network Sales. There, Barbara created a new telecommunications business sales unit that produced revenue in its first full year, and managed the sales force integration of five newly-acquired companies. She then joined Comcast Cable, where she successfully took on multiple progressively senior entrepreneurial roles, identifying new opportunities and growing them into successful revenue-generating programs.

Barbara is a Certified Executive Coach who also holds both a Bachelor’s Degree in Communications and a Master of Public Administration Degree from Pennsylvania State University. Her leadership skills were honed through a long career of successful senior roles, as well as in her participation in the communications industry’s top executive development programs.

Barbara has received many awards recognizing the impact she’s made including being named one of the Most Influential Minorities in Cable as a Technology Leader each year from 2012 through 2015. Committed to mentoring and giving back, Barbara also volunteers in her community. She is a former member of the Board of Directors of the Emma Bowen Foundation, the Penn State World Campus Advisory Board, and the proud mother of two sons, Kendall and Brendan.

Congratulations to the 2021 Scholar of the Year Awardees

The Scholar of the Year Award is the most prestigious award earned by a Scholar. This award is presented to a Scholar in each Scholar Group. To achieve this award, a Scholar demonstrated excellence in academic achievement, commitment in program activities through attendance, supported the community through participation in YMWIC’s community projects, outstanding performance in the Science Research Program and high levels of professional development.

2020-2021 YMWIC Scholars
TOGETHER, WE RISE.

Saint Vincent College attracts high-achieving students who place **we ahead of me.**
- More than 50 majors and programs
- Merit and need-based scholarships available
- Test-optional admission process available
- 98% of recent graduates are employed or furthering their education
- Catholic, Benedictine values-based community

**Congratulations to this year’s awardees!**
In Memorium

Mr. Derrick L. Campbell

was born on February 4, 1974, to Leslie and Sybil Campbell. He grew up in Philadelphia, PA, to be a bright and inquisitive young man. He always had a smile for you if your paths crossed. We rarely saw Derrick angry, and he always maintained a calm demeanor. Derrick had many interests including a love of the beach, an extensive comic book collection, movie lover, a coconut layer cake. Derrick transitioned on March 26, 2021, from colon cancer. All during his illness, he rarely complained about his circumstances. He was a stoic soldier, and we saw that and loved him even more. It was always his dream to be a father, and his family knows he would have been a wonderful one. In his honor and memory, a donation has been made to this great organization. A beautiful soul has passed through our lives, and we are forever... grateful.

This ad was placed by co-workers of Derrick Campbell.
Tyler Arboretum
would like to congratulate the
2021 YMWIC Scholars,
and we wish you continued success
in your academic pursuits!

Dear DJ,
We've watched you grow in size, spirit, intelligence, and wisdom from an adorable little baby to a young man. We couldn't be more proud of you than I am right now. When we look at you, we see the future of budding greatness. You are well equipped to meet the challenges of life because of your faith in God, your endurance, and your innate curiosity to explore and conquer the unknown. We know that your future will be bright and prosperous as you leave high school and go to college. Remember to always keep striving, pushing yourself to greater and greater heights to achieve your goals.

Love,
Dad & Mom
PREPARE FOR MORE THAN THE TEST.

PREPARE FOR TAKEOFF.

If you're reading this, chances are you understand that real success is about far more than grades and test scores.

You need a tutor who understands that, too.

I help students do their best work in the classroom and on standardized tests. I do it by cultivating skills that really matter and last a lifetime.

Contact me today and let's talk about what I can help you achieve.
CONGRATULATIONS TO ALL OF THE YMWIC SCHOLARS

YOUR SUCCESS IS A REFLECTION OF THE HARD WORK AND DEDICATION YOU HAVE DEMONSTRATED.

WE ARE SO VERY PROUD OF YOU ALL!

Supporting programs that make our community stronger.

At UGI, we’re responsible for meeting the energy needs of over a half million people in more than 45 Pennsylvania counties and parts of Maryland.

But our responsibility doesn’t end there. We also support our employees’ involvement in local programs, with a special emphasis on those that help children. Thanks to company policies that encourage volunteerism, 40% of our workforce – more than 500 employees – are actively participating.

Strong community involvement. It’s another example of how UGI is using our energy to do more.
Exelon congratulates the 2021 YMWIC scholarship recipients for their commitment to powering their future in STEM careers.

The Future is Equal

At Exelon, we believe the best ideas emerge when individuals from diverse backgrounds collaborate to tackle our biggest business challenges. Incorporating a range of perspectives and experiences into the way we think, plan, and work leads to innovative concepts, increased stakeholder engagement and better solutions to any challenges we face.
Building Communities and Environments that Endure.
